

MND ADVANCED PRACTICE IMMERSION WORKSHOP

You're invited to be part of this special 'MND Exchange' event; a collaboration between **Calvary Health Care Bethlehem** and **MND Victoria** where we take a deep dive into the practicalities of supporting those living with MND, gaining advanced tips and hands-on experience from experts in the field.

This immersive workshop will equip **allied health** and **nurse practitioners** who already work in this space, to better manage the more complex challenges experienced by those living with MND, increase their awareness of the latest innovations, broaden their knowledge-base and solidify their understanding of available supports and assistive technology.

Strictly limited spots, so register now!
